Hello, thank you for your purchase, I would like to share some things

*There are some pattern files that show specific measurements and some instructions on how to use the pattern. For some reason, I do not add that information to the Pattern file (Mainly for security reasons, limiting the case of unauthorized Pattern copying)

*The files cannot be used for laser or cnc cutting, you can print them on paper and stick them on cardboard for easier use or directly paste on the skin and cut

*So if you need any more information like:
- The size of a certain position on the Pattern
- How to use, how to pair - connect the parts
- Thickness of leather (depending on your preferences and the product you intend to make is a bag or purse, you like it soft or upright, depending on the leather you have available, you can decide for yourself a different leather thickness or refer to Consult experienced people in advance, don't be too stressed if it's your first time making leather goods or you just don't have much experience, relax and do it in the most natural way, time will help you a lot. more experience and increase your creativity, which will create a unique value for your item)

***Attention:
Pattern has the main purpose of helping you to have more beautiful and accurate leather cuts - In addition to the pattern, you need to know other skills such as punching, stitching, edging...

If you want to buy any kind of leather or accessory you can contact your local sellers for the best price, and they also know exactly what it is to advise you further. Or contact me, I will try to assist you as soon as possible, thanks!
