

Hello

My name is Behlul

Thank you for purchasing the product.

I tried to make the product error-free. I've included a step-by-step list of photos for you to see how I did it. After downloading the file, the image quality will increase and you can see it more clearly by zooming in. It will be a clue to understand how it is done.

There are many questions as to why you didn't provide a written instruction. My English is not good and I write using google.

Since I can't explain what I want to tell correctly, I try to show it in detail with videos or photos.

Recommended skin thickness is 1.1mm -1.8mm (I used 1.4mm). Made of vegetable leather. shape with water

It is an easy project that you can do with ease. You can use a 1mm-3mm-10mm hole punch for the holes. Be careful before cutting.

For more precise cuts, I recommend a sharp blade and an oblique grip.

Do not rush the cutting process. You can print the pattern on tracing paper for easier transfer, or transfer the pattern onto the leather with a simple tool after taping the paper with clear tape.

Let me know if you have any questions, I may be delayed due to the time difference. I need to sell more to stay afloat in this business.

I need your stars and comments so that others can buy my products and it motivates me better.

I work on demand. If there is a model you can't find the drawing of or if you have an idea, I can draw it for you. You can share your ideas.

Pattern is on the second page. You do not need to print this page.

Make it with love, use it with love.

Thank you :)
